SUMMARY

Frontend Developer passionate about building clean, fast, and beautiful web interfaces. Focused on writing maintainable code, responsive design, and accessibility. Open to freelance work and full-time opportunities.

PROJECTS

PhysioSync

[Live Demo](#)

A clean, professional landing page for a physiotherapy clinic. Emphasizes trust, clarity, and conversion, with a fully accessible, mobile-first layout. (*HTML, CSS, JavaScript, SEO*)

Cosmos

[Live Demo](#)

An interactive space-themed landing page with parallax scrolling, animated star fields, and smooth section transitions, focused on immersive visual storytelling through pure CSS and JS. (*HTML, CSS, JavaScript, Canvas*)

CTRL ZONE — Full-Stack Gaming Peripherals Store

[Live Demo](#)

A full-stack e-commerce platform for gaming gear, styled in a bold neo-brutalist design system with a dark/light theme toggle, hard-shadow UI, and a canvas-animated hero. Built with PHP, MySQL, and vanilla JS, complete with cart, checkout, auth, and an admin dashboard. (*PHP, MySQL, Vanilla JavaScript, CSS*)

MILESTONES

Aptech Vision Showcase	Presented an innovative web project at Aptech Vision, gaining experience in turning ideas into a working product.
Personal Projects	Built and deployed multiple frontend projects, exploring modern UI, responsive design, animations, and interactive experiences.
Public Repositories	Actively maintaining 10+ public repositories, documenting the learning journey in public on GitHub.
